

# EXECUTIVE SUMMARY REPORT

## ADDITIONS & REMODLEING TO: KROMREY MIDDLE SCHOOL

4/25/14

### What's New?

With the drilling of geothermal bore holes complete, trenching and excavation for the tie-in of the geothermal system has begun. Excavation and tie-in for the geothermal system will continue for the next month. Lockers, marker boards and tack boards have been installed in the 5<sup>th</sup> grade wing. Painting is now complete in the main entrance and cafeteria, and terrazzo floor installation is starting in these areas. Exterior masonry in the 6<sup>th</sup>, 7<sup>th</sup> and 8<sup>th</sup> grade light court has been completed, and interior masonry is finishing up in this wing.

### The Past Week

- Geothermal trenching and system tie-in has begun – Site

Lockers in the 5<sup>th</sup> grade wing are in place – Area D

Geothermal trenching and system tie-in is underway

Structure for the library stairs is in place – Area B

Footings and frost walls for the 5<sup>th</sup> grade wing have been poured – Area D

**Did you know?** The use of terrazzo dates back to the 15<sup>th</sup> century, when Venetian mosaic workers discovered that they could use leftover marble chips as a floor covering. Terrazzo wasn't used in the United States until the 18<sup>th</sup> century, when George Washington used it in his home in Mount Vernon. It quickly became a popular product in the U.S. due to its durability and low maintenance cost.
