

Last two weeks:

- Poured concrete slabs
- Completed structural masonry
- Completed roof steel
- Began laying brick

Coming up in the next few weeks:

- Complete masonry
- Mechanical rough-ins
- Fireproofing
- Roofing

Brick is complete on the west addition.

Both concrete slabs have been poured.

Steel roof framing is complete.

Installation of the roofing membrane has begun.

At the half way point of the summer the project is progressing well. Masonry and roofing are nearly complete. Over the next couple weeks the building will be enclosed in preparation for interior finishes.
