

# EXECUTIVE SUMMARY REPORT

PROVIDED BY FINDORFF

MIDDLETON-CROSS PLAINS AREA SCHOOL DISTRICT  
**BUILDING FOR OUR FUTURE**

PARK ELEMENTARY SCHOOL | 08.14.2020

## What's New?

Inside of the building, the concrete in the cafeteria was polished. The decals and lettering on the walls in the cafeteria have been completed. Tectum panels have been installed in the cafeteria. Toilets have been installed in the new bathrooms in the addition. The cafeteria vestibule leading outside has been installed. The hallway outside the receiving room has completed floor tiling and wall tiling. The doors in the hallway outside the receiving room have been installed. Acoustical ceiling grids have been installed and the tiles have been dropped in the kitchen and bathrooms.

Outside, grading has been done and landscaping begins. Areas have been seeded to the north side of the cafeteria addition. The exterior paneling and brick work has been completed. The retention pond has been prepared and will start soon. Roof coping is completed on the cafeteria addition. The door for the receiving room has been installed.

## DRONE FOOTAGE

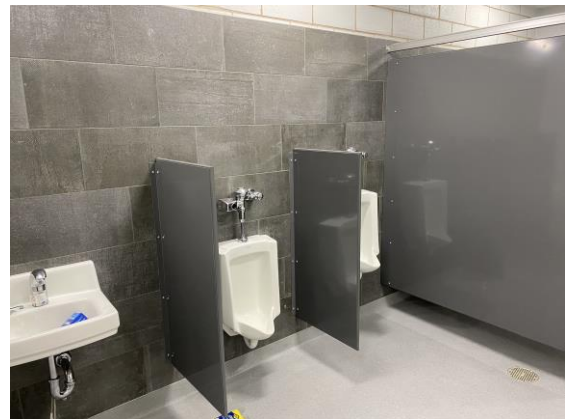

Click on the image to check out the latest progress!

## The Past Week:

- Polished Concrete Completed in Cafeteria
- Landscaping Added around New Addition
- Exterior Building Finishes Completed
- Wall and Floor Tiling Completed.

## Coming Up in the Week Ahead:

- Re-Balance the HVAC in the Addition
- Door Glass Installed in Cafeteria
- Installing Cloud Ceilings in the Cafeteria
- Installing Cabinets in the New Classroom

Toilets and sink installed in boys' bathroom in the cafeteria addition.

## DID YOU KNOW?

Polished concrete is one of many ways to finish a space. Polished concrete is made by grinding down the existing slab-on-grade until the concrete is smooth so it can then be treated with chemicals to harden the surface and give it the glossy look. The most difficult aspect of polished concrete is that you cannot patch damaged spots. Therefore, it's crucial to be careful in these areas.
