

Hello District families,

As the landscape around COVID-19 continues to rapidly shift, we are committed to communicating with you frequently. With spring break a week away, we know there are questions about traveling.

We are recommending that families not travel out of Wisconsin over spring break. Children who do travel over spring break may be asked to provide information about which states or countries they visited. Children who travel to [countries identified as Level 2 or Level 3 Travel Notice will be expected to self-quarantine at home for 14 days](#) and monitor for symptoms of COVID-19. The CDC is also recommending that cruise ship travel be postponed.

The [Wisconsin Department of Health Services](#) is recommending against non-essential travel to anywhere in the United States where the CDC has determined sustained community transmission is occurring. If you [travel to one of those states, your child or children will be expected to self-quarantine at home for 14 days](#) and monitor for symptoms of COVID-19.

Please keep in mind the number of states with sustained community transmission could change over the next two weeks and many health experts are expecting it to increase substantially.

If Governor Evers and DHS order that schools can open on April 6 and you did travel over spring break and are self-quarantined, your child would be unable to come to school until at least the following week.

Guidance from local, state, and federal health departments continues to evolve and change as new cases are diagnosed around the country. It's everyone's responsibility to use common sense and exercise good judgment about travel.

A similar message went out to our staff today as well.
