WISCONSIN

Dear Parent/Guardian of

The Wisconsin Immunization Schedule lists the recommended immunization schedule for children under 18 years of age. This letter is to inform you of the requirements for your child's school immunization record.

Most clinics follow CDC's Recommended Child and Adolescent Immunization Schedule (School Immunization Requirements). As a parent you will want to ensure your child's immunization record is up to date.

Required vaccines for students

- Hepatitis B vaccine— 1 dose
- MMR vaccine— 2 doses
- Varicella vaccine— 2 doses (if no disease history, 1 dose)
- DTaP vaccine— 4 doses (1st dose at 2 months of age)
- Polio vaccine— 4 doses

Please complete, sign and return this form if your child has not had the required immunizations.

If you have insurance or a primary care provider, you may want to schedule an appointment at Public Health-Madison. There are also links to our website.
