

The Farm to School Taste Test program exposes all students, whether they eat hot or cold lunch, to fresh, locally grown foods in a fun and playful way seven times each year.

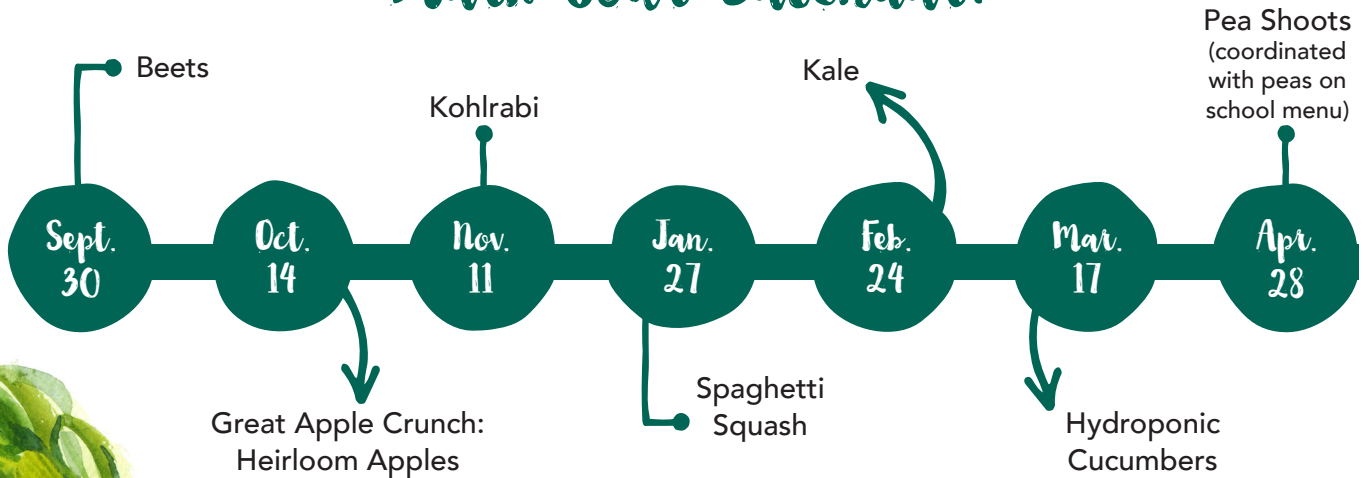

## Goals

- 1 For our students: expose students to fresh, seasonal foods in an engaging way that builds curiosity and knowledge.
- 2 For our parents: encourage parents to offer new and locally sourced foods to their kids at home and in lunchboxes.
- 3 For our schools: incorporate fresh, locally sourced foods into the school menus through testing of new foods in the lunchroom and by building relationships with local farmers.

## The Program

is **funded** by the parent organizations at each school and is able to reach **every** elementary and middle school **child** in the district.
